

# MAKING ORGANIZATIONS MORE HUMAN

## be more human, engage more powerfully

**Activate your people by unleashing their own personal power**

collective intelligence  
**The Whole Person Approach** *“the various modes we operate from”*

As we know, an environment fostering diversity is great, but it becomes meaningless without inclusion.

When it comes to inclusion, it's important to honor not only everyone's voice, but also the diversity of voices one can speak through from different modes of intelligence (head, heart, gut, imagination, etc).

By creating an environment that truly welcomes this level of inclusion, we can unlock the real power of people and teams: **collective intelligence (CQ)**.
